Economics majors obtain theoretical background necessary to understand business and policy issues, in addition to the quantitative and analytical skills necessary to constructively evaluate these issues independently. Graduates can be employed in the private, public, and non-profit sectors, or continue with advanced studies in business, law, and economics. There are three potential academic options for those with an interest in majoring or minoring in Economics. One route is obtaining a Bachelor of Science in Business within the Driehaus College of Business. The economics major in the College of Business combines the study of economics with the related business fields of accountancy, finance, marketing and management. The second option is to major within the College of Liberal Arts and Sciences. To earn a BA in economics, BA students are not required to take the core courses in the other business disciplines and may choose to combine economics with the study of mathematics, language or another social science. The third route extends BSB or BA studies by one year to then obtain a Master’s of Economics within the Bachelor’s/Master’s Policy Analysis degree program. The Master’s program enhances student’s quantitative skills which can be utilized to conduct policy analysis within government or in private sector employment.

**I CAN GO INTO... AND POSSIBLY WORK FOR... DOING THIS CAN HELP ME GET THERE...**

**ECONOMICS AREAS**

- Consulting firms
- Research firms
- Private corporations
- Federal government agencies including Department of Labor, Commerce, Health, Agriculture, State, Environmental Protection Agency
- Securities and Exchange Commission
- Labor unions
- Public utilities
- Local and state government agencies

**Sharpen Your Skills**

- Develop excellent quantitative, analytical, and computer skills along with verbal and written communication skills for describing findings to people with less technical backgrounds.
- Gain experience with survey design and working with large amounts of data.

**Gain Experience**

- Look for entry-level positions, such as Research, Economics Assistant, or openings in government agencies. Know that candidates with graduate degrees have more opportunities for advancement increase. Also, some roles in government require higher education such as doctoral degrees.
- Approximately 50% of economists work for the federal government.
- Complete an internship with a government agency or market research firm.

**Additional Strategies**

- Economists can specialize in a particular industry such as healthcare, transportation, or energy. Nearly all industries employ economists.
## Banking and Finance

**Potential Employers**
- Commercial banks
- Credit unions
- Financial Service Institution
- Federal Reserve banks

**Job Search Strategies**
- Sharpen Your Skills
  - Develop a solid business background in finance, accounting and marketing.
  - Develop interpersonal and communication skills in order to work with diverse clientele.

**Gain Experience**
- Get involved with investment clubs or serve as a treasurer for various student organizations.
- For investment banking opportunities, consider earning an MBA.
