WOMEN IN COMPUTING
at DePaul University’s College of Computing and Digital Media

April 24, 2018
9:30am–2:00pm
Daley Building (14 E. Jackson Blvd.)

The U.S. Department of Labor predicts that computing jobs will be among the fastest-growing and highest-paying over the next decade. Yet, women account for less than 20% of the workforce in computing careers. This event for high school girls will provide information about the 10 undergraduate programs at DePaul’s School of Computing, give participants a chance to hear from current computing students, and take part in an activity at the Idea Realization Lab, DePaul’s community makerspace.

The day will include:
- A presentation about the College of Computing and Digital Media at DePaul (CDM) and careers in STEM
- A tour of the Loop campus
- Hands-on participation in an activity at the Idea Realization Lab
- Lunch
- An undergraduate student panel
- Information about admission and next steps
